

FARMERDOGE

**BECOME A FARMING
PARTNER**

ABOUT US

We are a multi-dividend rewards token operating on the binance smart chain. This allows us to pick and choose any project on the binance network and pay rewards to our holders in the nominated Token.

The Farmerdoge team will vet potential reward tokens, shortlist them and then put them forward to our community to vote on via our DAO system. The winner of that vote will be farmed for a 3 week period.

OUR EXPERIENCE

We have a core team of 27 members who each bring a different element/skill to the Farmerdoge stable. This diverse family has helped us shape Farmerdoge to what it is today. Please read our whitepaper for more information about our use, utility & team

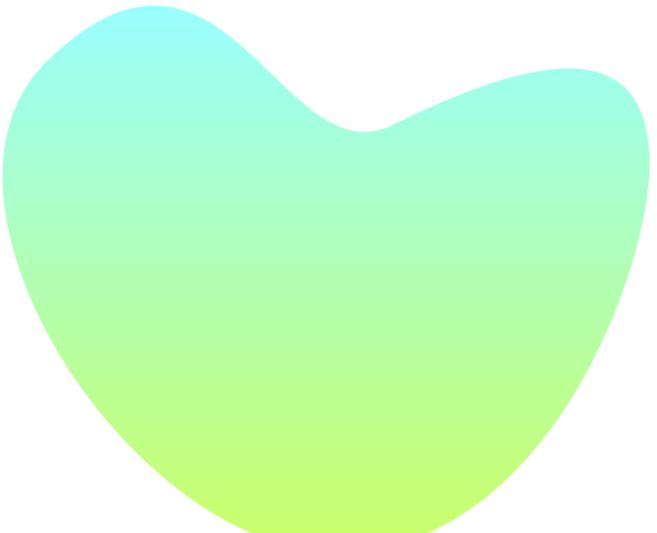

BENEFITS TO YOU AS A POTENTIAL PARTNER

As a potential Farming partner you have an exciting opportunity to share your project to our community. You will receive a 20 minute time slot within our "Sorting through seeds" AMA to explain your project to our holders and answer any queries.

This gives you exposure to our holders regardless if you are chosen to be farmed or not.

The community will then vote on the shortlisted projects via our DAO voting system. Where holders of our native token vote on the project they want to farm (You are encouraged to share this process with your own community and encourage them to buy FD to sway the vote in your favour)

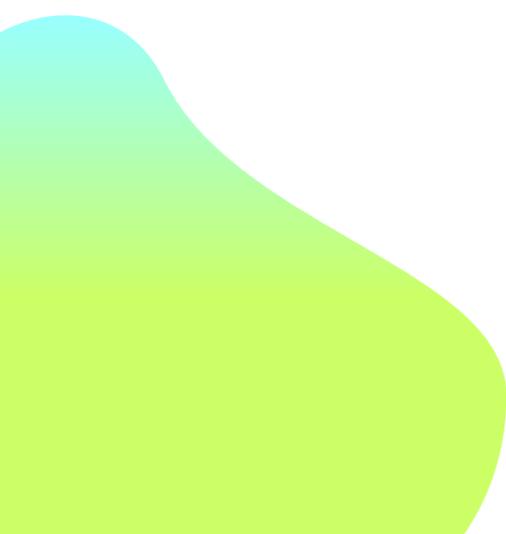

IF YOU ARE PICKED AS THE FARMING TOKEN

If your project is then successfully chosen by our community we will go deep into your project via our "Cream of the Crop" AMA. You will have up to an hour to explain the ins & outs of your project & answer our communities queries.

This extended AMA gives you the chance to sell our holders on your project and potentially gain 3,500+ long term investors.

You then get three weeks of Farmerdoge pumping volume through your chart which means more \$\$ to your liquidity pool & marketing wallet via your own tokenomics

CASE STUDY

TCG 2.0

We started farming TCG 2.0 on the 13th November until the 30th November. TCG gained over 3,000 holders and we put in just under \$3,000,000 of buys over this timeframe. (\$6,000,000 if all our holders sold)

Here is the TCG 2.0 Chart from the 13th to 30th November

And our volume chart for the same time frame.

Imagine if this volume was put through Your own project and what your marketing wallet & liquidity pool would look like afterwards?

WHAT WE WANT IN RETURN

- The ability to soft shill in your telegram during the voting phase (this goes both ways, happy for your community to be active and promoting your token within our TG explaining the use case/benefits etc). We will push our community to congratulate the shortlisted projects. So you will see our members pop into your TG, acknowledge the shortlist and engage/interact with your community. Im sure they'll also have lots of questions to ask also.

- Whilst we are under 10,000 holders, the AMA's & opportunities associated with the farming application will be free. After we surpass 10,000 Holders there will be a fee for applying to be farmed. Similar to the costs of call channel AMA's etc

Our advice, get in whilst it's FREE

THANK YOU!

**WE LOOK FORWARD
TO WORKING WITH
YOU!**
